

## ADJUSTABLE SLIDE SHIELDS

These high-quality adjustable slide shields can be used on drills, mills, saws, or special machine applications. The transparent portion of these shields is constructed of durable, clear  $\frac{3}{16}$ "-thick polycarbonate. The shield places a barrier between an operator and the flying chips (swarf), sparks, and coolant generated at the point of operation.

These shields can be mounted vertically or horizontally on the flat surface of any machine. The transparent portion of the shield attaches to the mounting brackets and offers a slide adjustment of  $3\frac{1}{2}$ ". Two standard size shields with  $30^\circ$  sides are available:  $7\frac{3}{4}$ " x 11" and  $9\frac{1}{2}$ " x 19". Contact us for other shield sizes or longer adjustments.

Adjustable slide shield on front column of machine.

### Adjustable Slide Shield—7" Front
